Module A

Project Management -Fundamentals and Trends

E-learning Platform

Overview

Description

Alternative Modules

1. Content

Self Management

In an increasingly complex, globalised, and interdependent world, Self Management becomes more important. A core requirement before leading other is to know how to lead yourself. This course focuses on the aspects of self management, time management and stress management. This course includes case studies and role play activities to develop skills and competences of students through real situations. The international orientation of the students is utilized to create case studies and role plays which are especially valid for European/ international projects.

Topics include:

- Identification of one's own strengths and weaknesses
- Self-Reflection about own behavior
- Identification of work preferences
- Identification of time savers and time wasters and how to deal with them
- Finding ones elves resources and use them
- Define reachable goals and learn how to prioritize them

Social Competence

Project management is teamwork. Therefore social competence is an important factor for success. Especially any lack of social competence can cause serious problems and may lead to failure of the complete project. This course focuses on the aspects of social competence, which are especially relevant for project management (e.g. communication, leadership, team development, conflict management and motivational aspects) As some of these aspects will be taught in other courses (e.g. Self Management, Leadership & Teams), this course adds the open aspects and integrates them all under the general roof of social competence. This course includes case studies and role play activities to develop skills and competences of students through real situations. The international orientation of the students is utilized to create case studies and role plays which are especially valid for European/ international projects. This offers the opportunity to experience the complexities of human interaction with single individuals as well as groups to explore and develop the necessary social competence to manage projects.

Topics include:

- Communication
- Leadership
- Team development
- Conflict management
- motivation

2. Learning Outcomes / Competencies

2.1 Professional Competencies

2.1.1 Knowledge

The students

- will gain an understanding about Self-Management and Social Competence
- know relevant Theory about these topics
- know about the importance of Self-Management and socials competence on project management

2.1.2 Skills

You will experience how you can ...

- motivate your team for your project
